To Whom it May Concern:

MRB Contractors recently replaced the entire dome roof of the terminal building at the Chattanooga Metropolitan Airport after experiencing severe damage from a wind storm. The project involved removing the remaining copper roof from the building and installing a new metal roof in its place. The curvature of the dome made for a challenging project but the MRB team worked diligently to complete the project as quickly as possible even during challenging weather conditions. They were extremely easy to work with throughout the project and went above and beyond to keep a neat workspace which was important given its location on the airport. MRB Contractors was a pleasure to work with, and we would highly recommend them for any roofing project.

Sincerely,

Terry L. Hart
